## **Job Summary**

The Quality Analyst (QA) is a trusted authority in quality investigations and defect analysis. Primary responsibilities include tracking, reporting, and resolving defects while working closely with Operations, Vendor Management, and Court Clerks to ensure data accuracy and foster trust across the organization. This role also collaborates with the Continuous Improvement Team to optimize platform functionality and ensure the reliability and trustworthiness of data provided to Quality and Executive teams. By prioritizing precision and transparency, the QA strengthens trust in decision-making and drives operational excellence.

## **Duties and Responsibilities**

- Create, monitor, respond to, and track CMS error tickets to ensure timely resolution.
- Conduct investigations into result findings using court websites or direct court communication.
- Track quality performance and provide monthly data analytics reporting for awareness programs.
- Maintain professional communication with clients and vendors to resolve defects and implement corrective actions.
- Support the development of statistical reports and quality data for internal and external processes.
- Contribute to quality improvement cycle management, including business operations and direct client communications.

- Serve as the subject matter expert, using independent judgment to review and identify quality-related defects across processors, researchers, vendors, and systems. The integrity of these investigations influences client outcomes and internal performance decisions.
